TOP 3 TRENDS IN HONG KONG'S
PROPERTY & FACILITY MANAGEMENT INDUSTRY
香港物業及設施管理行業三大趨勢

Top 3 Trends in Hong Kong's Property and Facility Management Industry
香港物業及設施管理行業三大趨勢

Property Maintenance and Repair
物業維修及保養

Hong Kong's dense urban environment and aging infrastructure drive demand for technologies in property inspection and repair. BIM, AI-guided robotic hammers, drones with sensors and infrared cameras, etc., are now widely used to monitor and assess structural damage in infrastructure.

香港建築密集，基礎設施老化，對物業檢查及維修科技的需求與日俱增。BIM技術、人工智能纜繩槌敲機械人、附感測器和紅外線鏡頭的無人機等技術，現已廣泛應用於檢測和評估樓宇設施結構。

Universal Design
通用設計

Shopping malls, offices and retail units in Hong Kong are embracing universal design to address the needs of elderly and people with disabilities. A shining example is Central Market, whose step free access and smart toilets have earned widespread public acclaim.

香港許多購物中心、辦公室和零售場所相繼採用通用設計，以回應長者和殘疾人士出行需求，例如中環街市便憑藉無障礙通道及智能洗手間設計獲得廣泛好評。

Sustainability
可持續發展

Buildings consume 90% of Hong Kong's electricity, making energy efficiency crucial for reaching carbon neutrality by 2050. Companies are actively optimising energy use, for example Build4Asia buyer Sino Property Services leverage AI-driven management system to reduce energy consumption by 20–40%.

建築物的耗電量佔全港總耗電量九成，因此提升能源效率便是實現2050碳中和的關鍵。部分企業積極響應，如Build4Asia買家信和物業管理有限公司便引入人工智能管理系統，將能源消耗降低了 20-40%。
