Security Technology & Trends: Opportunities & Threats in Asia
亞洲安全科技與趨勢 ：機遇與威脅

The soaring cyber, infrastructure and physical risks have thrust security issues into the spotlight. Supported by the Hong Kong Police Force and other key international security associations, Asian Securitex Conference will explore modern trends and technologies to help stakeholders assess their vulnerabilities, modify response protocols and manage risks ahead. A wide range of topics such as cybercrime, insider threats, human assets, data ethics, etc., will be covered to offer audience a comprehensive overview of Asia's security market.

隨著網絡、基礎建設及人身安全隱憂日益加深，區內安全問題備受社會關注。亞洲安防會議邀請了香港警務處及多個國際保安協會探討最新科技及趨勢，助持份者偵察安全漏洞，完善應變機制， 防範未然。 會議涵蓋網絡犯罪、內部威脅、人力資產、數據道德等多個熱門議題，帶領觀眾深入亞洲安全體系。

Conference Programme
會議日程

9:00 - 9:30	

9:30 - 9:45

Welcome Remarks & Keynote Speech
歡迎辭及主題演講
Mr Stephen Yip, BBS, MH, JP
Vice-Chairman, Security and Guarding Services Industry Authority (SGSIA)

9:45 - 10:20

The Latest Cyber Security and Technology Crime Trend
Inspector of Police
Hong Kong Police Force - Cyber Security & Technology Crime Bureau (CSTCB)

With the rapid advancement of technology, cyber threats are becoming increasingly complicated, such as the widely use of Internet of Things (IoT). In the presentation, Mr. CHAN will share the latest technology crime situation, and the common strategies as well as tips used to prevent cyber attacks.

10:30 - 11:00	Build4Asia 2020 Opening Ceremony 展會開幕典禮
11:00 - 11:20	Refreshment & Networking Break 茶歇及交流

11:20 - 11:55

Safe Cities: Terrorism Readiness and Response
Mr Peter Morgan
Director, Crisis Avert Limited

With the emergence of terrorist groups over the years and the increase of so-called "lone-wolf" individuals determined to harm others, especially the civilian population, the threat has increased significantly and it has become harder to anticipate and interdict their activities. It has therefore become more important than ever for authorities to have an effective and comprehensive approach to maintaining public safety and security. Whilst many organizations do indeed follow the basic precepts of Prepare, Prevent, Respond and Recover, they nonetheless remain vulnerable in a number of key areas.

This presentation highlights some of the key difficulties organizations face when dealing with active threat incidents and will share some best practices and strategies for ensuring a fully capable and competent response to any emerging or ongoing active threat incident.

11:55 - 12:30

Tech & Manpower: Security Planning for Emergency Response
Mr Peter Messervy
Director, Group Security, China Light & Power

CLP relies on tens of thousands of individual physical assets to deliver energy to its customers across APAC. Each of these assets has value, although some are more critical to the business than others, so security requirements can vary. The talk will focus on a prevailing question when assessing sites: namely how valid is the use of technical solutions over human and what factors best determine this.

12:30 - 13:00	**Security Cloud: An Efficient and Cost Effective Tool for Managing Security Personnel in Hong Kong**

Mr Johnny Ho
CEO, Johnny's Group & Chairman, Chamber of Security Industry

The security services industry has been striving for many years to elevate how it's perceived in the public opinion and it has made great progress in this endeavor. The security officers of today are professionals who tend to be better educated and well trained to handle a diverse range of situations. Meanwhile, technology continues to evolve and becomes increasingly important in supporting the security industry.

To ensure the safety of the on-duty security personnel and enhance management efficiency and reliability, CSI initiated the Security Cloud System, a project funded by the Office of the Government Chief Information Officer, in order to provide better service quality to clients by implementing innovative technology.

13:00 - 14:30	**Lunch 午膳**

14:40 - 15:15	**Enhanced Air Cargo Security**

Mr Francis Ng
Consultant - Aviations and Logistics, G4S Secure Solutions (Hong Kong) Limited

With the change of Policy Direction from the International Civil Aviation Organisation (ICAO) to enhance air cargo security, the Hong Kong Government has tightened its Regulated Air Cargo Agents Regime (RAR) requirement to meet the changes. As a result, demands for cargo screening are expected to surge significantly.

Ensuring sufficient screening capacity and giving due consideration to cargo movements efficiency, Hong Kong Government has rolled out a Regulated Air Cargo Screening Facilities (RACSF) Scheme last year to facilitate cargo screening at the off-airport locations. While the tightening of air cargo security is a big challenge to the industry, G4S Secure Solutions (Hong Kong) Limited has taken up the challenge with its business partners and made it an opportunity to expand its commitment to the air cargo industry.

15:15 - 15:50	**Data Ethics / Ethical Risks during Digital Transformation**

Mr Tim Virtue
Founder, TechView Partners

Although some of us strategically began our journey of digital transformation on our own timeline, unprecedented events of 2020 have now forced an operational path forward, with many real-time and complex ethical risks. Despite these challenges, there are many opportunities for an ethically driven digital transformation. Attendees will learn identify and manage the most common ethical risks in digital transformation.

15:50 - 16:15	**Refreshment & Networking Break 茶歇及交流**

16:15 - 16:55	**Panel Discussion 專題座談會:** **Challenges to the Private Security under the Pandemic Crises?**

Moderator:
Mr Bruce Lee
Chairman, International Professional Security Association (Hong Kong)

Panelists:
Mr Johnny Ho, CEO, Johnny's Group & Chairman of Chamber of Security Industry
